Michael John-Charles

Computer Science student

I am a BSc (Hons) computer science student, studying at Kingston university. I have experience in several programming languages in order to get an idea of what job I want to pursue in the future. I created different projects such as websites, apps and games. I love to learn new things and expand my knowledge on the topic of computer science. So, I want to build that knowledge with an internship at this company. I believe that I am very hardworking and motivated with whatever task I am given and I strive to be reliable with whatever job I am working on.

Experience

2023 - Present

Kingston University

Student Mentor

For this job i am require to mentor and support first-year students on modules that i have previously taken and help them advance into there future years at university. This job was recommended to me by one of my lecturers and i accepted and eventually started this position in September 2023.

2020 - 2022

Horakty LTD

Apprentice electrician

I installed electrical systems and wiring in buildings, tested electrical circuits and conducted electrical inspections in various different buildings.

This enhanced my ability to work under high pressured environments.

This also improved my communication skills as i had to work with all different types of people for different lengths of time.

Demonstrated attention to detail ensuring all wiring was accurate as it was very important to keep people safe.

Projects

Online tech website

This was a e-commerce website created using HTML, CSS and JavaScript that sold tech items such as phones laptops and PC's. This was a project made for my college EPQ.

2022

BlackJack

A simple two player game of blackjack created in java for an assignment in my first year of university.

2023
